

## Fuel Surcharges

**In the recent time fuel prices has seen wild fluctuations, which ultimately result in hike in fuel surcharges / freight charges by various airlines, fuel surcharge by major co-loader, airport handling charges by airport authorities and freight charges by the railways. In view of this, the company's compelled to increase its fuel surcharge, time to time, in tandem with the hike by the said operators. The current fuel surcharge at present is minimum 30%. However, owing to frequent changes in the fuel costs and charges by various airlines and also the co-loaders, the overall operating costs are liable to go through a commensurate revision.**
